Topography from aerial photographs by multiplex methods
Aerial photographs taken 1952. Field check 1955

Polyconic projection. 1927 North American datum
10,000-foot grid based on California coordinate system, zone 5

1000-meter Universal Transverse Mercator grid ticks,
zone 11, shown in blue

To place on the predicted North American Datum 1983
move the projection lines 1 meter north and
78 meters east as shown by dashed corner ticks

There may be private inholdings within the boundaries of
the National or State reservations shown on this map

Map photoinspected 1973

No major culture or drainage changes observed.

The diagram illustrates the relationship between magnetic and true north. A vertical line represents True North (GN). A star symbol is at the top of this line. Another line, representing Magnetic North (MN), points towards the upper right. The angle between GN and MN is labeled 15°. Below the GN line, there are two horizontal tick marks labeled 0° 36' and 11 MILS. To the right of the MN line, there are two horizontal tick marks labeled 15° and 267 MILS. The caption below reads: "UTM GRID AND 1955 MAGNETIC DECLINATION AT CENTER OF S."

Map photoinspected 1973
No major culture or drainage changes observed
